LEMBAGA PEMBANGUNAN INDUSTRI PEMBINAAN MALAYSIA v. KONSORTIUM JGC CORPORATION & ORS (SUED AS INCORPORATED PARTNERSHIP)

FEDERAL COURT, PUTRAJAYA
ZULKEFLI AHMAD MAKINUDIN CJ (MALAYA)
SURIYADI HALIM OMAR FCJ
HASAN LAH FCJ
ABU SAMAH NORDIN FCJ
ZAHARAH IBRAHIM FCJ
[CIVIL APPEAL NO: W-01(f)-44-10-2013(W)]
26 OCTOBER 2015

BUILDING AND CONSTRUCTION LAW: *Construction contracts – Levy – Imposition of levy – Whether excluded non-construction components of construction work and works performed offshore – Whether levy to be imposed upon whole contract price or only part of it – Meaning of 'construction works' – Whether to be construed as 'integral and preparatory work' – Whether contract price and obligations under lump sum turnkey contract was divisible or a single transaction for levy purposes – Construction Industry Development Board Act 1994, s. 34*

CIVIL PROCEDURE: *Summary procedure – Preliminary issue of law – Necessary and material facts proved or admitted – Construction of provisions of Construction Industry Development Board Act 1994 and Construction Industry (Collection of Levy) Regulations 1996 – Interpretation to be given to contractual documents – Whether suitable for summary disposal – Rules of Court 2012, O. 14A*

CONTRACT: *Lump sum contract – Contract price – Contract price under lump sum turnkey contract – Whether divisible – Whether a single whole construction contract – Whether levy under s. 34 of Construction Industry Development Board Act 1994 to be imposed on whole contract price or only part of it*

STATUTORY INTERPRETATION: *Construction of statutes – Rules of construction – Strict construction – Section 34 of Construction Industry Development Board Act 1994 – Imposition of levy under s. 34 – Whether excluded non-construction components of construction work and works performed offshore – Purposive interpretation – Ordinary meaning of words – Objective of statute – Interpretation Acts 1948 and 1967, s. 17A*

The appellant, a statutory body established under the Construction Industry Development Board Act 1994 ('the Act'), was authorised under s. 34(2) of the Act to impose on every registered contractor, a levy of a quarter percent of the contract sum. Under reg. 6(1) of the Construction Industry (Collection of Levy) Regulations 1996 ('1996 Regulations'), the appellant was the relevant authority that determines the contract sum of the construction works, for purposes of the amount of levy. The respondent was a registered contractor under the Act and was a consortium of five contractors, comprising two foreign parties and three Malaysians (collectively referred as

'the respondent'). The respondent was awarded a contract worth USD1,481, 254,000 plus Euro59,640,000 to participate and construct a national gas plant in Bintulu Sarawak. A formal construction agreement ('EPCC contract') was executed between the owner and the respondent. The appellant then imposed a levy at the prescribed rate of RM13,129,934.05 on the respondent which the latter disputed on the ground that the correct levy was RM2,802,130.21, arrived at by disregarding sums attributed to the 'offshore works' and the 'non-construction works'. The respondent only paid RM2,802,130.02 thus leaving unpaid a balance of RM10,327,803.84. The appellant filed an action at the High Court for the balance. The appellant applied O. 14A of the Rules of the High Court 1980 to determine the following questions: (i) whether a levy could be imposed under the Act on construction works which was undertaken outside Malaysia; and (ii) whether construction works under the Act would include non-construction works such as engineering, procurement, supervision, management and other ancillary services. The High Court held that the appellant had misconstrued the Act, together with the relevant documents, causing it to levy an incorrect amount under the 1996 Regulations. The appellant's appeal to the Court of Appeal was dismissed. Hence, the present appeal. The issues that arose for the court's determination was (i) whether the appellant had correctly construed the Act and the relevant documents and determined and imposed a correct levy amount, in particular; (ii) whether construction works done offshore as part of construction works within Malaysia fall within the definition of 'construction works' as found in s. 2 of the Act, which is outside the ambit of s. 34, given that such works were to be performed outside Malaysia; (iii) whether the imposition of the levy under s. 34 of the Act excludes the non-construction components of a construction work; (iv) whether the imposition of the levy under s. 34 of the Act excludes the non-construction works performed offshore such as engineering, procurement, supervision, management, equipment and materials supplied on an FOB basis, and other ancillary services; and (v) whether the contract was in fact a supply contract coupled with a construction contract, which was consolidated in one contract for convenience and efficiency; and if so whether the supply contract should be subject to a levy under the Act.

Held (allowing appeal)
Per Suriyadi Halim Omar FCJ delivering the judgment of the court:

(1) In an O. 14A application, it is crucial that all the necessary and material facts relating to the subject matter of the question have been duly proved or admitted. There must be no substantial factual disputes left to be resolved. On the present facts, the factual issues were way past behind, with the remaining dispute centering on the construction of a provision of the Act, the 1996 Regulations and the interpretation to be given to the contractual documents, namely the letter of award, the EPCC contract and the consortium agreement between the respondents. (paras 38 & 39)

(2) A levy is a tax and in this case, was created by the Act. The language of a statute imposing a tax, duty, charge or levy must be strictly construed, and with no intendment permitted. Words must be given their ordinary meaning. Nothing is to be read in, and nothing is to be implied, and once that meaning is clear due regard must be given to them. Any ambiguity detected must lean in favour of the taxpayer charged with paying the tax, duty, charge or levy. Section 17A of the Interpretation Acts 1948 and 1967 also enjoins a purposive reading to be undertaken when interpreting a statute. Taxing statutes like all other statutes must be given a purposive interpretation to fulfill the objective of the statute, unless the circumstances demand otherwise. (para 43)

(3) Generally, under a lump sum contract, price is agreed upon by parties before the works begin. It is a single whole construction contract as opposed to a divisible contract. It was obvious from the letter of award that the contract awarded to the consortium was a 'fixed non-escalating lump sum contract price …'. Hence the contract price could not be split up. The EPCC contract at art. 24.3 stipulated that the respondent accepted the deeming provision of being aware that the contract price was lump sum based. (para 50)

(4) The contract awarded to the respondent was a lump sum turnkey contract and hence not divisible. This view was sufficient to answer the submission of the respondent that the levy under s. 34 of the Act is restricted to the construction works, which excluded non-construction works such as engineering, procurement, supervision, management, and other ancillary services. (para 58)

(5) Going by the natural meaning, the engineering design procurement works that form part of the 'construction works', include all 'integral and preparatory' work that will lead to a successful performance of the contract. Surely no construction works may be carried out satisfactorily without the requisite design, drawings, supervision or planning preceding it. Article 2.1 of the EPCC contract also stated that the term 'work' consisted of all things to be performed and services to be rendered in connection with the realisation of the project. (para 63)

(6) Although a contractual transaction may involve a series of transactions it may nevertheless be a single transaction for levy purposes. Looking at the scheme in the EPCC contract as a whole, it was a single transaction. Furthermore, in the letter of award, the respondent agreed to be made liable to the levies imposable on the contract price as finalised in art. 8.1 of the EPCC contract. (para 65)

(7) The contract price was the total 'fixed non-escalating lump sum', tagged at USD1,481,254,000 plus Euros59,640,000 (not being divisible). The explicit factoring of the levy into the contract price showed that the parties expected offshore transactions and non-construction works to take place. Clearly levy was expected to be imposed on them. (para 67)

(8) As the commercial transaction was undertaken through the respondent (contractor), a tax presence was created within Malaysia to enable a levy to be imposed. The levy was on the contract sum to be paid in Malaysia to the registered contractor's accounts *ie*, the respondent, and not to individual Consortium members. (para 68)

Bahasa Malaysia *Translation Of Headnotes*

Perayu, sebuah badan berkanun yang ditubuhkan di bawah Akta Lembaga Pembangunan Industri Pembinaan 1994 ('Akta'), diberi kuasa di bawah s. 34(2) Akta untuk mengenakan levi sebanyak satu perempat peratus nilai kontrak terhadap setiap kontraktor berdaftar. Di bawah per. 6(1) Peraturan-Peraturan Industri Binaan (Pungutan Levi) 1996 ('Peraturan-Peraturan 1996'), perayu adalah pihak berkuasa relevan yang menentukan nilai kontrak kerja pembinaan bagi tujuan amaun levi. Responden adalah kontraktor berdaftar di bawah Akta dan adalah sebuah konsortium lima kontraktor yang terdiri daripada dua pihak asing dan tiga rakyat Malaysia (secara kolektif dirujuk sebagai 'responden'). Perayu diawardkan satu kontrak bernilai USD1,481,254,000 dan Euro59,640,000 untuk menyertai dan membina sebuah loji gas nasional di Bintulu Sarawak. Satu perjanjian pembinaan rasmi ('kontrak EPCC') dimeterai antara pemilik dan responden. Perayu kemudiannya mengenakan levi pada kadar yang ditetapkan iaitu RM13,129,934.05 terhadap responden, yang mana dipertikaikan oleh responden atas alasan bahawa levi yang betul adalah RM2,802,130.21 yang dikira dengan mengabaikan nilai yang dikaitkan dengan 'offshore works' dan 'non-construction works'. Responden hanya membayar RM2,802,130.02 dan meninggalkan baki yang tidak berbayar sebanyak RM10,327,803.84. Perayu memfailkan tindakan di Mahkamah Tinggi bagi baki tersebut. Perayu memohon di bawah A. 14A Kaedah-Kaedah Mahkamah Tinggi 1980 untuk menentukan persoalan-persoalan berikut: (i) sama ada levi boleh dikenakan di bawah Akta bagi kerja-kerja pembinaan yang dijalankan di luar Malaysia dan sama ada kerja-kerja pembinaan di bawah Akta merangkumi kerja-kerja bukan binaan seperti kejuruteraan, pemerolehan, penyeliaan, pengurusan dan perkhidmatan sampingan lain. Mahkamah Tinggi memutuskan bahawa perayu telah menyalahtafsir Akta, berserta dokumen-dokumen berkaitan, menyebabkan ia mengenakan amaun levi yang salah di bawah Peraturan-Peraturan 1996. Rayuan perayu di Mahkamah Rayuan ditolak. Oleh itu, rayuan ini. Isu-isu yang timbul adalah sama ada perayu telah mentafsir Akta dan dokumen-dokumen relevan dengan betul dan menentukan dan mengenakan amaun levi yang betul; (ii) sama ada kerja-kerja pembinaan yang dibuat di pesisir pantai sebagai sebahagian daripada kerja-kerja pembinaan dalam Malaysia termasuk dalam takrif 'construction works' seperti yang termaktub dalam s. 2 Akta, yang mana berada luar lingkungan s. 34, memandangkan kerja-kerja sedemikian dijalankan di luar Malaysia; (iii) sama ada pengenaan levi di bawah s. 34 Akta mengecualikan komponen-komponen bukan binaan kerja-kerja pembinaan; (iv) sama ada pengenaan levi

di bawah s.34 Akta mengecualikan kerja-kerja bukan binaan yang dijalankan di pesisir pantai seperti kejuruteraan, pemerolehan, penyeliaan, pengurusan, peralatan dan bahan dibekalkan berasaskan FOB dan perkhidmatan sampingan lain; dan (v) sama ada kontrak sebenar adalah kontrak bekalan yang digabungkan dengan kontrak pembinaan yang telah disatukan dalam satu kontrak untuk kemudahan dan kecekapan; dan sekiranya ya, sama ada kontrak bekalan tertakluk kepada levi di bawah Akta.

Diputuskan (membenarkan rayuan)
Oleh Suriyadi Halim Omar HMP menyampaikan kehakiman mahkamah:

(1) Dalam satu permohonan A. 14A adalah penting agar semua fakta yang diperlukan dan material yang berkaitan hal perkara bagi persoalan telah dibuktikan atau diperakui. Mesti tidak terdapat pertikaian fakta besar untuk diselesaikan. Berdasarkan fakta ini, isu-isu fakta telah lama berlalu, dengan pertikaian selebihnya berpusat pada tafsiran peruntukan Akta, Peraturan-Peraturan 1996 dan tafsiran yang diberikan kepada dokumen-dokumen kontrak iaitu surat award, kontrak EPCC dan perjanjian konsortium antara responden-responden.

(2) Levi adalah cukai dan dalam kes ini diwujudkan oleh Akta tersebut. Perbahasaan statut mengenakan cukai, duti, caj atau levi yang perlu ditafsir dengan ketat dan tiada tujuan dibenarkan. Ungkapan mesti diberi maksud biasa. Tiada yang harus dibaca dengan dan tiada yang tersirat dan apabila makna itu jelas, perhatian yang sewajarnya perlu diberikan padanya. Sebarang kesamaran yang dikesan mesti memihak kepada pembayar cukai yang dikenakan untuk membayar cukai, duti, caj atau levi. Seksyen 17 Akta Tafsiran 1948 dan 1967 juga yang mewajibkan pembacaan bertujuan apabila mentafsir statut. Statut cukai seperti statut-statut lain perlu diberi pentafsiran bertujuan untuk memenuhi objektif statut melainkan keadaan menuntut sebaliknya.

(3) Secara umumnya, di bawah kontrak harga penuh, harga dipersetujui oleh pihak-pihak sebelum kerja-kerja dimulakan. Ia merupakan kontrak pembinaan keseluruhan tunggal berbanding dengan kontrak terbahagi. Jelas berdasarkan surat award bahawa kontrak yang diawardkan kepada konsortium adalah 'fixed non-escalating lump sum contract price …'. Oleh itu, kontrak harga tidak boleh dibahagikan. Kontrak EPCC pada per. 24.3 menetapkan bahawa responden menerima peruntukan tersebut tahu bahawa harga kontrak berasaskan sekaligus.

(4) Kontrak yang diawardkan kepada responden adalah kontrak *turnkey* sekaligus dan justeru tidak boleh dibahagikan. Pandangan ini adalah mencukupi untuk menjawab hujahan responden bahawa levi di bawah s. 34 Akta adalah terhad kepada kerja-kerja pembinaan yang tidak termasuk kerja-kerja bukan binaan seperti kejuruteraan, pemerolehan, penyeliaan, pengurusan dan perkhidmatan sampingan lain.

(5) Mengikut maksud semulajadi, kerja-kerja perolehan reka bentuk kejuruteraan yang menjadi sebahagian daripada 'construction works' termasuk semua kerja 'integral and prepatory' yang menjurus kepada satu pelaksanaan kontrak yang berjaya. Sudah pasti tiada kerja-kerja pembinaan boleh dijalankan dengan memuaskan tanpa keperluan reka bentuk, lukisan, penyeliaan atau perancangan yang berdiri dengan sendirinya. Perkara 2.1 kontrak EPCC turut menyatakan bahawa istilah 'work' terdiri daripada semua perkara untuk dipersembahkan dan perkhidmatan yang akan diberikan berkaitan dengan merealisasikan projek ini.

(6) Walaupun satu transaksi kontrak mungkin melibatkan satu siri transaksi namun ia mungkin satu transaksi untuk tujuan levi. Melihat pada skim dalam kontrak EPC secara keseluruhan ia adalah satu transaksi. Tambahan lagi, dalam surat award responden bersetuju dikenakan tanggungan levi yang dikenakan terhadap harga kontrak seperti yang dimuktamadkan dalam per. 8.1 kontrak EPCC.

(7) Harga kontrak adalah jumlah 'fixed non-escalating lump sum' dilabelkan pada USD1,481,254,000 dan Euros59,640,000 (tidak boleh dibahagikan). Pemfaktoran eksplisit levi ke dalam harga kontrak menunjukkan bahawa pihak-pihak menjangka transaksi pesisir pantai dan kerja-kerja bukan binaan untuk berlaku. Dengan jelas, levi dijangka akan dikenakan ke atas mereka.

(8) Oleh kerana transaksi komersial dijalankan melalui responden (kontraktor) kehadiran cukai diwujudkan dalam Malaysia bagi membolehkan levi dikenakan. Levi tersebut adalah nilai kontrak untuk dibayar di Malaysia ke dalam akaun kontraktor berdaftar iaitu responden dan bukan ahli-ahli individu konsortium.

Reported by Amutha Suppayah

JUDGMENT

Suriyadi Halim Omar FCJ:

[1] Lembaga Pembangunan Industri Pembinaan Malaysia (the appellant) is a statutory body established under the Construction Industry Development Board Act 1994 (the Act). The Act in brief, empowers the appellant to be a one stop body to promote, and stimulate the development, improvement and expansion of the construction industry in Malaysia. The statutory powers and many functions of the appellant are laid down in ss. 3 and 4(1) of the Act. For clarification, hereinafter any section mentioned in this ground of judgment refers to section of the Act, unless stated otherwise.

[2] Under s. 34(2) the appellant is authorised to impose on every registered contractor (but before the commencement of any construction works having a contract sum of above RM500,000) a levy of a quarter per centum of the contract sum. That levy is funnelled to a fund set up under s. 15 to enable the appellant to discharge its functions pursuant to the Act.

[3] "Contract sum", as legislated under s. 34(2), is defined under sub-s. (8) of s. 34 to mean "the consideration for a contract in respect of any construction works". "Construction works" is defined in s. 2 as follows:

> "construction works" means the construction, extension, installation, repair, maintenance, renewal, removal, renovation, alteration, dismantling, or demolition of
>
> (a) any building, erection, edifice, structure, wall, fence or chimney, whether constructed wholly or partly above or below ground level;

(b) any road, harbour works, railway, cableway, canal or aerodrome;

(c) any drainage, irrigation or river control works;

(d) any electrical, mechanical, water, gas, petrochemical or telecommunication works; or

(e) any bridge, viaduct, dam, reservoir, earthworks, pipeline, sewer, aqueduct, culvert, drive, shaft, tunnel or reclamation works,

and includes any works which form an integral part of, or preparatory to or temporary for the works described in paras. (a) to (e), including site clearance, soil investigation and improvement, earthmoving, excavation, laying foundation, site restoration and landscaping.

[4] The appellant under reg. 6(1) of the Construction Industry (Collection of Levy) Regulations 1996 (1996 Regulations) is the relevant authority that determines the contract sum of the construction works, for purposes of the amount of levy. Hereinafter any regulation mentioned will refer to a regulation in the 1996 Regulations unless stated otherwise. By reg. 6(2), in determining the contract sum, the appellant may take into consideration the following factors:

(a) the consideration in respect of any construction works contained in the letter of acceptance, letter of award or any document that constitutes acceptance relating to the construction works;

(b) the consideration in respect of any construction works in the contract which is signed by the parties thereto; or

(c) the particulars and information in respect of the consideration relating to the execution of any contract on any construction works contained in any relevant document.

[5] In support of its appeal the appellant also alludes to the contract documents exchanged between the owner and the contractor.

[6] The seriousness of the Act is reflected adequately in s. 34(5), which legislates that when a registered contractor fails to pay any levy due within a prescribed period, the contractor shall be guilty of an offence, and shall on conviction be liable to a fine not exceeding RM50,000.

[7] The respondent is a registered contractor under the Act and is a consortium of five contractors, comprising two foreign parties and three Malaysians (collectively referred to as the respondent) established solely to undertake the impugned construction works. Shorn of the contractual intricacies, the respondent was awarded *vide* a letter of award dated 29 October 1999, a contract worth USD1,481,254,000 plus Euro 59,640,000 to participate and construct a national gas plant in Bintulu Sarawak, with the owner being Petronas Malaysia Liquid Natural Gas Tiga Sdn Bhd (owner).

[8] Another relevant contract document executed between the owner and the respondent is the formal construction agreement (EPCC contract) dated 21 January 2000. The respondent executed among themselves a consortium agreement dated 21 January 2000 to cater for their internal arrangement, an agreement that did not include the owner.

[9] By a notification of imposition of levy dated 6 December 2000 (the notice) under reg. 7 the appellant imposed a levy at the prescribed rate of RM13,129,934.05 on the respondent.

[10] The respondent disputed the levy sum and instead argued that the correct levy was RM2,802,130.21, arrived at by disregarding sums attributed to the "offshore works" and the "non-construction works". Ignoring the full amount in the notice the respondent only paid RM2,802,130.02 thus leaving unpaid a balance of RM10,327,803.84. The appellant then filed an action at the High Court for the balance.

[11] To dispose of the matter the appellant filed an O. 14A of the High Court Rules action. Having gone through the questions, the High Court Judge summed up the issues before him in the following manner, *viz* whether a levy could be imposed under the Act on construction works which was undertaken outside Malaysia, and whether construction works under the Act would include non-construction works such as engineering, procurement, supervision, management and other ancillary services.

[12] The High Court Judge ruled in favour of the respondent and found that the appellant had misconstrued the Act, together with the relevant documents, causing it to levy an incorrect amount under the 1996 Regulations.

[13] Being dissatisfied, the appellant appealed to the Court of Appeal but lost. On 2 September 2013 the appellant successfully obtained leave from this court on the following questions of law:

(1) whether the plaintiff ("the appellant") has construed the CIDB Act and the relevant documents wrongly and determined and imposed an incorrect levy amount (according to reg. 6 of the Construction Industry (Collection of Levy) Regulations 1996, in particular:

(i) whether construction works done offshore as part of construction works within Malaysia fall within the definition of "construction works" as found in s. 2 of the CIDB Act (and hence are outside the ambit of s. 34) given that such works are to be performed outside Malaysia;

(ii) whether the imposition of the levy under s. 34 of the CIDB Act excludes the non-construction components of a construction work, namely engineering, procurement, supervision, management, and other ancillary services;

(iii) whether the imposition of the levy under s. 34 of the CIDB Act excludes the non-construction works performed offshore such as engineering, procurement, supervision, management, equipment and materials supplied on an FOB basis, and other ancillary services; and

(iv) whether or not the contract in fact is a supply contract coupled with a construction contract, which was consolidated in one contract for convenience and efficiency; and if so whether the supply contract should be subject to a levy under the CIDB Act; and

(2) whether the plaintiff is entitled to interest notwithstanding that the CIDB Act does not provide for interest and if so, how is the interest to be calculated?

Submissions Of Parties

The Appellant's Submission

[14] The appellant began by submitting that levy was imposable under the Act on a registered contractor for construction works where the contract sum exceeded RM500,000.

[15] It submitted that the respondent was a registered contractor under the Act, comprising a consortium of five contractors, two being foreign parties and three being Malaysians, established solely for the purpose of undertaking the present construction works. Evidentially the certificate of registration dated 28 June 2000 was issued in favour of the respondent as a single entity.

[16] With the full contract sum for the project being USD1,481,254,000 plus Euro 59,640,000 the respondent clearly qualified to be imposed with a levy under the Act.

[17] The appellant clarified that this was an EPCC contract ie, an engineering, procurement, construction and commissioning contract. It was a single purpose turnkey contract, subject to fixed pricing, and not based on bills of quantities which could be varied. In a word it was a contract that was indivisible.

[18] In support of its argument, the appellant referred to the letter of award dated 29 October 1999 (see tab 3, ACB vol. 2), where it is stated that "the contract is awarded to you based on your commitment to a fixed non-escalating lump sum contract price (inclusive of taxes, duties and other related costs) of USD1,481,254,000 plus Euros 59,640,000".

[19] The appellant ventilated that the contract sum constituted the cost of all the resources (including the onshore and offshore portion), and covered the equipment, materials, labour, transportation and all other things necessary for the due execution and completion of the project. There was no justification to divide the contract sum into different parts according to the works done by the individual member contractors.

[20] The appellant was not concerned as to how the resources (be it equipment or material) were procured, whether offshore or onshore. As long as the equipment or the other resources were components of the construction works, they were subject to levy imposition.

[21] The appellant further submitted that from the outset, as per the letter of award, the contract price was also inclusive of taxes and duties by which the contractor could be made liable. Under art. 8.1 of the EPCC contract, the contractor undertook to pay, *inter alia*, "levies" of "whatever nature" in connection "with the work and payment of the contract price".

[22] On the legal aspect, counsel for the appellant submitted that the definition of the word "construction works", was an enlarged definition under the Act. It was argued that there was no particular word within the definition that fell for interpretation that warrants the application of the maxim "*noscitur a sociis*".

[23] To explain its stance the appellant cited the example of the term "work" which was defined in a comprehensive way as a single whole, and not by reference to any divisible components. Article 2 of the EPCC contract was wide enough in its scope to include all things, and not limited to the preparation and supply, the purchase and manufacture, the provision of all necessary construction equipment, the mobilisation and controlling of adequate labour force, commissioning and testing of the project etc.

[24] The appellant submitted that it was envisaged by all parties that the preparatory and supply elements were included. That meant the contract was a comprehensive contract which encompassed both construction and non-construction components and falling within the definition of "works".

[25] Learned counsel for the appellant submitted that the levy was for a construction project within the jurisdiction. It was not disputed that the respondent was a registered contractor in Malaysia for purposes of contract works, with the levy imposed on the respondent as the contractor, and not on its individual consortium members.

[26] The appellant clarified that it was only the design work and the procurement of materials that were done offshore, to be brought into Malaysia eventually for the contract works. In short, it was submitted that the above circumstances created enough of a tax presence within Malaysia, to make the levy a Malaysian levy, rather than an extraterritorial levy.

The Respondent's Submission

[27] In reply, learned counsel for the respondent submitted that the nature of the relationship between the respondent's component members could be gauged from art. 2.4 of the consortium agreement which states that "In no event shall the parties hereto consider the consortium to be, or in any way acts as though as it were, a corporation, partnership or any other form of entity having any independent legal personality whatsoever".

[28] The respondent clarified that it was a consortium of contractors comprising JGC Corporation of Japan, Kellogg Brown Root Inc. of USA, Sime Engineering Sdn Bhd, JGC (Malaysia) Sdn Bhd, and Kellogg (Malaysia) Sdn Bhd. The latter two are Malaysian subsidiaries of the first two foreign corporations, all of which are part of the contractual arrangements between themselves, jointly and severally guaranteeing the due performance of the contract works.

[29] In essence, it was argued that the respondent was not a single legal entity but a group of companies that came together to collaborate and work on a contract.

[30] The respondent clarified that the structure of the EPCC contract was drawn up in accordance with the owner's instructions as it was not the latter's practice to split the offshore and onshore works into two contracts.

[31] The respondent highlighted that the EPCC contract provided for offshore contract price to be paid to the non-Malaysian incorporated members for works performed outside Malaysia, whereas onshore contract price would be paid to the Malaysian incorporated members for works performed within Malaysia.

[32] The respondent submitted that the levy under s. 34 was restricted to the construction works component of the EPCC contract, and excluded non-construction works such as engineering, procurement, supervision, management, and other ancillary services.

[33] The respondent submitted that the definition of "construction works" in s. 2, focused on the physical works performed, and the works mentioned in paras. (a) to (e) of the definition therefore must not stray from the physical nature of all works described in the definition and must necessarily be works carried out on-site. Thus, the contract sum constituted the cost of all the resources excluding the offshore portion when it came to the levy imposition under s. 34.

[34] The respondent submitted that it was crucial to read the definition of "construction works" harmoniously, and as parts of an integral whole, and as being interdependent.

[35] Applying the "*noscitur a sociis*" principle, paras. (a) to (e) and the examples of works must be read together, in order to ascertain the true meaning of the phrase "an integral part of, or are preparatory to or temporary for the works described in paras. (a) to (e)". In this regard, the respondent submitted that the court ought to take into account the words or phrases preceding the words which were being interpreted to ensure that they were of the same kind (*ejusdem generis*) with the rest of the definition, and the Act as a whole, and referable to the same subject matter.

[36] The respondent relied on s. 1(2), which states that the application of the Act is confined to Malaysia, hence not having any extraterritorial application. No levy thus could be imposed on offshore works. In the instant case, the respondent highlighted that the design, procurement and engineering works were all works performed outside of Malaysia, ie, offshore.

[37] That being the case the appellant had no power to impose any levy on works carried out and performed outside of Malaysia hence exceeding its authority.

Decision

[38] We begin by briefly discussing the mode of action, which alludes to O. 14A of the Rules. This Order enables the High Court to determine any question of law or construction of documents arising in any cause or matter at any stage of the proceedings, where to the court such questions are suitable for determination without going through a full trial, and that determination will dispose of the entire matter. In order to do that it is crucial that all the necessary and material facts relating to the subject matter of the question have been duly proved or admitted. In a gist there are no substantial factual disputes left to be resolved. In *The Malaysian High Court Practice 2001 Desk Edition* at para. 14A.1.3 the writers authored:

> The question of law or construction must be suitable to be determined without the full trial of the action. The test of whether the question of law or construction is 'suitable' to be determined under this order is whether all the necessary and material facts relating to the subject matter of the question have been duly proved or admitted. This postulates that there is no dispute or no further dispute exists as to the relevant facts at the time when the court proceeds to determine the question. The suitability of disposing of an action under this order depends entirely on whether the court can determine the question of law raised without a full trial of the action.

[39] From the submission and evidence before us, we are satisfied that the factual issues are way past behind us, with the remaining dispute centering on the construction of a provision of the Act, the 1996 Regulations and the interpretation to be given to the contractual documents, namely the letter of award, the EPCC contract and the consortium agreement.

[40] We note that the appellant viewed the construction works under the EPCC contract as a single composite transaction for levy purposes under the Act.

[41] We accept that the appellant is entrusted to determine the contract sum in respect of any construction works ie, after a perusal of the contract documents exchanged between the owner and the respondent.

[42] We noted the respondent's position of certain construction works undertaken outside Malaysia, and of non-construction works such as engineering, procurement, supervision, management and other ancillary services to be excluded for calculation of the levy. We noted too of the respondent's stance that the construction works under the EPCC contract were divisible, with only certain components being subject to levy. It was on that basis that it was willing to pay RM2,802,130.02 to the appellant.

[43] A levy is a tax and in this case was created by the Act. It is well settled that the language of a statute imposing a tax, duty, charge or levy must be strictly construed, and with no intendment permitted. Words must be given their ordinary meaning. Nothing is to be read in, and nothing is to be implied, and once that meaning is clear due regard must be given to them. Any ambiguity detected must lean in favour of the taxpayer charged with paying the tax, duty, charge or levy (*Mangin v. Inland Revenue Commissioner* (1971) AC 739; *Cape Brandy Syndicate v. Inland Revenue Commissioners* (1921) 1 KB 64).

[44] The above general principles of interpreting a tax imposing statute are still woven into the fabric of the principles of construction of taxing provisions despite the introduction of s. 17A of the Interpretation Acts 1948 and 1967. Section 17A of the latter Act enjoins a purposive reading to be undertaken when interpreting a statute; with such statutory backing, a literal and blinkered approach must now compete with the context and purpose of the Act as legislated by Parliament. With a litany of cases in abundance, it is now well established that taxing statutes like all other statutes must be given a purposive interpretation to fulfil the objective of the statute, unless the circumstances demand otherwise.

[45] In this connection, it is useful to make reference to the decision of the Federal Court in *Palm Oil Research and Development Board Malaysia & Anor v. Premium Vegetable Oils Sdn Bhd* [2004] 2 CLJ 265; [2005] 3 MLJ 97 where the court spoke of the application of the *Ramsay* principle emphasising the purposive interpretation of taxing statutes. To make it clearer, we highlight the relevant portion and it reads:

> 29. The *Ramsay* case [1982] AC 300 liberated the construction of revenue statutes from being both literal and blinkered. It is worth quoting two passages from the influential speech of Lord Wilberforce. First, (at p. 323) on the general approach to construction:
>
> > What are 'clear words' is to be ascertained upon normal principles: these do not confine the courts to literal interpretation. There may, indeed should, be considered the context and scheme of the relevant Act as a whole, and its purpose may, indeed should, be regarded.
>
> 30. Secondly (at pp. 323-324), on the application of a statutory provision so construed to a composite transaction:

> It is the task of the court to ascertain the legal nature of any transaction to which it is sought to attach a tax or a tax consequence and if that emerges from a series or combination of transactions, intended to operate as such, it is that series or combination which may be regarded.

31. The application of these two principles led to the conclusion, as a matter of construction, that the statutory provision with which the court was concerned, namely that imposing capital gains tax on chargeable gains less allowable losses was referring to gains and losses having a commercial reality ("The capital gains tax was created to operate in the real world, not that of make-belief") and that therefore (p. 326):

> To say that a loss (or gain) which appears to arise at one stage in an indivisible process, and which is intended to be and is cancelled out by a later stage, so that at the end of what was bought as, and planned as, a single continuous operation, there is not such a loss (or gain) as the legislation is dealing with, is in my opinion well and indeed essentially within the judicial function.

32. The essence of the new approach was to give the statutory provision a purposive construction in order to determine the nature of the transaction to which it was intended to apply and then to decide whether the actual transaction (which might involve considering the overall effect; of a number of elements intended to operate together) answered to the statutory description. Of course this does not mean that the courts have to put their reasoning into the straitjacket of first construing the statute in the abstract and then looking at the facts. It might be more convenient to analyse the facts and then ask whether they satisfy the requirements of the statute. But however one approaches the matter, the question is always whether the relevant provision of statute, upon its true construction, applies to the facts as found. As Lord Nicholls of Birkenhead said in *MacNiven v. Westmoreland Investments Ltd* [2003] 1 AC 311, 320, para 8:

> The paramount question always is one of interpretation of the particular statutory provision and its application to the facts of the case.

[46] It is significant to observe that the Federal Court in the case of *Lembaga Hasil Dalam Negeri Malaysia v. Alam Maritim Sdn Bhd* [2014] 3 CLJ 421; [2014] 2 MLJ 1 endorsed the approach in the above *Palm Oil Research Board* case, hence settling the current interpretative position in our country. This court in *Alam Maritim Sdn Bhd* said:

> After tracing the history of how courts treat the interpretation of taxing Acts, culminating with the promulgation of s. 17A of the 1948 and 1967 Interpretation Acts and subsequent cases, the purposive approach is here to stay. The intention of Parliament therefore cannot be discounted even if the matter in the Act pertained to taxing issues.

[47] To wind up the discussion under this heading, the consequential effect of the rapid economic growth in this country, and where mega projects and joint ventures by Malaysian based companies together with offshore entities are no more a rarity, makes it more imperative that the objective and purpose of the Act be implemented. This purposive and practical approach will surely assist and fulfil the task of the appellant, together with the levy mechanism to manage, develop and regulate the construction industry, tremendously.

[48] In order to answer the leave questions posed for our determination, it naturally follows that we need to decide whether s. 34, upon its true construction, applies to the facts before us. And of course, we cannot but determine beforehand the details of the transaction. In *Barclays Mercantile Business Finance Ltd v. Mawson (Inspector of Taxes)* (2005) 1 AC 684 the House of Lords opined:

> But however one approaches the matter, the question is always whether the relevant provision of the statute, upon its true construction, applies to the facts as found.

Whether The Construction Contract Was A Lump Sum Contract

[49] The letter of award dated 29 October 1999 reveals that the construction contract carried a price tag of a fixed lump sum of USD1,481,254,000 plus Euro 59,630,597 million equivalent to RM5,867,062,431.93. In fact those were the very word used in the above letter as reproduced below. It reads as follows:

> ... JGC/KBR/SIME/JMSB/KMSB CONSORTIUM
>
> 3-1, Minato Mirai 2-Cnome, Nishi-Ku
> Yokohama 220-6-1
> Japan
>
> Dear Sir,
>
> Letter Of Award For Engineering, Procurement, Construction And Commissioning Contract (EPCC) For LNG-3plant Project
>
> 1. We hereby take pleasure to inform you that Malaysia LNG Tiga Sdn Bhd (MLNG TGA) has accepted your proposal to undertake the EPPC Work for LNG-3 Plant Project situated at Bintulu, in the state of Sarawak, Malaysia.
> 2. ...
> 3. ...
> 4. The Contract is awarded to you based on your commitment to a fixed non-escalating lump sum Contract Price (inclusive of taxes, duties and other related costs) of US Dollars One billion, four hundred and eighty one million, two hundred and fifty four thousand (US$1,481,254,000.00) plus Euro Fifty nine million, six hundred and forty thousand (Eu 59,640,000.00).

A Yours faithfully

For and behalf of
Malaysia LNG Tiga Sdn Bhd

...

B Abdullah bin Karim
Project Director

[50] Generally, under a lump sum contract a lump sum contract price is agreed upon by parties before the works begin. In a lump sum construction contract it is a single whole construction contract as opposed to a divisible C contract. *The Major Law Lexicon* (by P Ramanatha Aiyar) 4th edn vol. 4 defines a lump sum contract as a type of contract under which the contractor agrees to undertake and complete constructional works for a given price, and if costs exceed price, the loss is borne out by the contractor. If the extra work carried out is with the principal's approval (subject to any extra conditions) D that extra cost may be recoverable. (*Sharpe v. San Paolo Railway Company* (1873) LR Ch App 597; *Coker v. Young* (1860) 2 F&F 98).

[51] When discussing the issue of extra payments, Keating on *Construction Contracts* (9th edn) at p. 105 wrote:

E A lump-sum contract is a contract to complete a whole work for a lump sum eg, to build a house for £60,000. If the house is completed in every detail required by the contract the contractor is entitled to £60,000. And if extra work was carried out it may be able to recover further payment.

[52] Having appreciated the intricacies of a lump sum contract we now move on to scrutinise the letter of award, the EPCC contract and the F consortium agreement. It is obvious from the letter of award that the contract awarded to the consortium is a "fixed non-escalating lump sum contract price …" (p. 294 RR). Call it fixed, non-escalating or lump sum, separately or collectively, the effect is still the same ie, the contract price cannot be split up. As if to emphasise the meeting of the mind, the EPCC contract at G art. 24.3 (when agreeing to the applicability of Malaysian law) stipulates that the respondent accepts the deeming provision of being aware that the contract price is lump sum based.

[53] The issue of the lump sum contract is connected to the submission of the appellant that this was a turnkey project. By agreeing to this submission, H it means that the LNG project is to be fully operational when handed over to the owner. This submission is borne out clearly in the EPCC contract of 21 January 2000 where the following terms were agreed upon:

I And Whereas Owner wishes Contractor to undertake the complete realisation of the aforesaid Project in accordance with the terms and conditions as hereinafter specified.

[54] Perusing further the other terms of the EPCC contract the respondent in the recital has undertaken to complete the project in accordance with the agreement and within the specified period of time (art. 2.3 at p. 306 of the RR). A

[55] Having sifted the relevant documents we accept the appellant's submission that the contract entered into by the owner and the respondent was a turnkey contract. The facts fall squarely under the type of contract where it is singular in purpose and at a fixed price. Suffice if we refer to *Black's Law Dictionary*, 9th edn (p. 369), which explains "turnkey contract" in this manner: B

> engineering, procurement, and construction contract. C
>
> A fixed-price, schedule-intensive construction contract - typical in the construction of single-purpose projects, such as energy plants - in which the contractor agrees to a wide variety of responsibilities, including the duties to provide for the design, engineering, procurement, and construction of the facility; to prepare start-up procedures; to conduct performance tests; to create operating manuals; and to train people to operate the facility. Also termed turnkey contract. D

[56] We also accept the argument that the owner was never concerned with how the respondent went around completing the project. Had the owner been concerned surely it would have participated in the consortium agreement of 21 January 2000. With its financial might, and with a battery of lawyers at hand, a water tight divisible contract could easily have been drafted for the owner. E

[57] The documents showed that the owner's main responsibility was the prompt payment of the contract price to the contractor once the project was completed (art. 6). F

[58] We therefore hold the view that the contract awarded to the respondent by the owner is a lump sum turnkey contract and hence not divisible. This view is sufficient to answer the submission of the respondent that the levy under s. 34 of the Act is restricted to the construction works, which excluded non-construction works such as engineering, procurement, supervision, management, and other ancillary services. We therefore reject this submission of the respondent as reflected in paras. 31 and 32 of this judgment. G

Section 2 ('Includes') - The Meaning Of "Construction Works" Under s. 2 Of The Act H

[59] Despite our comprehensive view as stated at para. 57 above, the respondent's argument ventilated at paras. 31 and 32 may also be answered in this manner. The natural starting point is by appreciating the interpretation of "construction works". Section 2 of the Act reads as follows: I

> "construction works" means the construction, extension, installation, repair, maintenance, renewal, removal, renovation, alteration, dismantling, or demolition of -

A (a) any building, erection, edifice, structure, wall, fence or chimney, whether constructed wholly or partly above or below ground level;

(b) any road, harbor works, railway, cableway, canal or aerodrome;

(c) any drainage, irrigation or river control works;

B (d) any electrical, mechanical, water, gas, petrochemical or telecommunication works; or

(e) any bridge, viaduct, dam, reservoir, earthworks, pipeline, sewer, aqueduct, culvert, drive, shaft, tunnel or reclamation works,

and includes any works which form an integral part of, or are preparatory C to or temporary for the works described in paragraphs (a) to (e), including site clearance, soil investigation and improvement, earth-moving, excavation, laying of foundation, site restoration and landscaping; …

[60] The respondent argued that any works, which "form an integral part of" or "are preparatory to" the works in paras. (a) to (e) of the definition, D does not include offshore works or non-construction works. The respondent has relied heavily on the "*noscitur a sociis*" principle.

[61] We are of the view under the "*noscitur a sociis*" principle it may be said that the meaning of a questionable word or phrase in a statute may be ascertained by reference to the meaning of words or phrases associated with E it. Apart from explaining that questionable word or phrase the accompanying words may even limit it. Abdoolcader J in *Ipoh Garden Sdn Bhd v. Ismail Mahyuddin Enterprise Sdn Bhd* [1975] 1 LNS 66; [1975] 2 MLJ 241 explained it in more detail in this way:

F It is a fundamental rule in the construction of statutes that associated words (*noscitur a sociis*) explain and limit each other. The meaning of a doubtful word or phrase in a statute may be ascertained by a consideration of the company in which it is found and the meaning of the words which are associated with it. The rule "*noscitur a sociis*" is frequently applied to ascertain the meaning of a word and consequently the intention of the legislature by reference to the context, and by considering G whether the word in question and the surrounding words are, in fact, *ejusdem generis*, and referable to the same subject-matter. Especially must it be remembered that the sense and meaning of the law can be collected only by comparing one part with another and by viewing all the parts together as one whole, and not one part only by itself.

H **[62]** Having perused s. 2 of the Act and the facts of this case, we have instead placed our reliance on the word "includes", rather than alluding to the principle of "*noscitur a sociis*". The word includes is generally used to enlarge words or phrases in a statute, as in the current Act, with those words or phrases together with those they should include, understood to have their I natural meaning (*Dilworth v. The Commissioner of Stamps* (1899) AC 99). Edgar Joseph Jr in *Public Prosecutor v. Hun Peng Khai & Ors And Other Cases* [1984] 2 CLJ 290; [1984] 2 CLJ (Rep) 391; [1984] 2 MLJ 318 at p. 324 had

occasion to remark that the word "includes" is a word of extension and not of definition. Evans J in *Loke Yung Hong v. Ng See See (F) And 3 Others* [1948] 1 LNS 29; [1948] 1 MLJ 123 opined:

> … one using the word 'include' indicates an extension of the ordinary meaning which may be attached to the word.

[63] Going by the natural meaning, we are satisfied that the engineering design procurement works, that form part of the "construction works", include all "integral and preparatory" works that will lead to a successful performance of the contract. Surely no construction works may be carried out satisfactorily without the requisite design, drawings, supervision or planning preceding it. Keating in *Law and Practice of Building Contracts* (2nd edn) at p. 59 had occasion to write:

> Lump sum contract for whole work-widely defined
>
> Indispensable necessary works
>
> Where the contractor must complete a whole work[3] such as a house, or a railway from A to B. For a lump sum, the courts readily infer a promise on his part to provide everything indispensably necessary to complete the whole work.[4] Such necessary works are not extras for they are impliedly included in the lump sum.[4]

Evidentially, art. 2.1 of the EPCC contract also states that the term "work" consists of all things to be performed and services to be rendered in connection with the realisation of the project.

Consortium Agreement

[64] We are aware, and did consider the fact that the division of responsibilities are well documented, as executed in the consortium agreement between the consortium partners. On the other hand we are satisfied that this division of duties was merely an internal arrangement among themselves; a clear recognition of each other's respective responsibility. The non-involvement of the owner in this consortium agreement amplifies its lack of concern for the internal arrangement.

Series Of Transaction

[65] We find merit in the appellant's submission that although a contractual transaction may involve a series of transactions it may nevertheless be a single transaction for levy purposes. Looking at the scheme in the EPCC contract as a whole we view the transaction as a single transaction.

Implication Of The Respondent's Agreement To Pay The Levies For The Indivisible Contract Price (Inclusive Of The Off-shore Transactions And Non-construction Works)

[66] In the letter of award the respondent agreed to be made liable to the levies imposable on the contract price as finalised in art. 8.1 of the EPCC contract. We reproduce this article below for convenience and reference:

> Without prejudice to art. 8.2 all rentals, royalties, fees, charges, taxes (including corporate and personal income tax, service and withholding taxes), levies, imposts or other duties of whatever nature required to be paid in connection (with the Work and the payment of the Contract Price shall be paid by the Contractor).

[67] The contract price is the total "fixed non-escalating lump sum", tagged at USD1,481,254,000 plus Euros 59,640,000 (not being divisible). The importation and reference of the whole contract sum into art. 8.1 by the explicit factoring of the levy into the contract price convinced us that parties expected off-shore transactions and non-construction works to take place. And clearly levy was expected to be imposed on them. As these two contentious items had not escaped the attention of both parties, the respondent was deliberately made responsible for the expected levy payment. If the respondent were to be freed of the imposable levies for the off-shore contracts and non-construction works, for whatever reason, surely the EPCC contract would have made the respondent liable only to the contract price minus the expenditure of off-shore and non-construction components. Therefore, not only did art. 8.1 confirm the appellant's argument that this was an indivisible contract but the respondent also anticipated to be levied for the off-shore and non-construction works component.

Extraterritoriality

[68] The respondent argued that the Act applies only to Malaysia and has no extraterritorial application; no levy therefore may be imposed on works carried out outside Malaysia, ie, offshore works. On the other hand, the appellant canvassed that the design work and the procurement of materials though done offshore were eventually brought into Malaysia thus creating sufficient tax presence here. We are satisfied that in the circumstances of the case, as the commercial transaction was undertaken through the respondent (contractor), a tax presence was created within Malaysia to enable a levy to be imposed. Lord Scarman in *Clark (Inspector of Taxes) v. Oceanic Contractors Ltd* [1983] 2 AC 130 had occasion to clarify on the issue of tax presence in the following manner:

> But the present case is concerned with the territorial limitation to be implied into a section which establishes a method of tax collection. The method is to require the person paying the income to deduct it from his payments and account for it to the revenue. The only critical factor, so far as collection is concerned, is whether in the circumstances it can be made effective. A trading presence in the United Kingdom will suffice …

[69] It must be understood that in the instant case, the levy is on the contract sum to be paid in Malaysia to the registered contractor's accounts ie, the respondent, and not to individual consortium members. The certificate of registration of 28 June 2000 concretises this trading presence (see para. 15 for clarification).

Conclusion

[70] For the above reasons we find substance in the submission of learned counsel for the appellant. We hold the view that the EPCC contract is a lump sum contract and find no justification to split the contract sum into different parts, according to the work done by the individual member contractors.

[71] The EPCC contract is a comprehensive contract and includes both construction and non-construction components.

[72] We hold that the appellant has not construed the Act and the relevant documents wrongly or has imposed an incorrect levy amount on the respondent.

[73] For the above reasons, we allow the appellant's appeal.

[74] Questions 1 (i) and (iv) are to be answered in the positive whilst questions 1 (ii) and (iii) are to be answered in the negative. As the appellant did not submit on Question 2 we refrain from answering it.

[75] Costs.
